

Information to candidates for PGCE Secondary ICT and Computer Science

Congratulations!

You have been invited to interview for a place on the PGCE Secondary ICT and Computer Science programme at Cardiff Metropolitan University - we are very much looking forward to meeting you and hearing about what you have to offer as a potential teacher of secondary ICT and Computer Science. This letter gives you information on what you will be asked to do during the interview day, and also gives you a clear idea of what we are looking for in a potential teacher of ICT and Computer Science. It is designed to help you prepare accordingly so you have the best chance possible to be successful.

There will be three parts to the interview process, which may not take place in the order given.

Part 1

You will undertake tests in literacy, numeracy and digital competence. There will also be an extended writing task in response to an article on an educational topic, through which we will be able to assess your reading and writing skills. You will receive the article in advance of the day for preparation, so take the opportunity to read it thoroughly and understand its main points. This part of the day will take approximately two hours.

Part 2:

You will participate in a group discussion on the topic below:

Question: As a teacher with a 'specialism in ICT and Computer Science', but with a recognition that you will also be supporting the delivery of the Digital Competence Framework (DCF) across the curriculum, what sort of skills and qualities do **you** feel we should be developing in our young people?

Research the following documents to support your answer

- **Successful Futures** - the 4 core purposes and draft guidance
- Digital Competence Framework

We will be looking for:

- A good level of participation in the task;
- Clear communication and interaction with others;
- Use of your subject expertise to generate and sustain your point;
- Effective responses to questions and the views of others, developing ideas as appropriate and/or questioning or challenging what is heard on the grounds of reason and/or evidence.

Part 3 will consist of a short individual interview in which you can explain your motivation for becoming a secondary ICT and Computer Science teacher, and demonstrate your understanding of the role of the teacher in a mainstream school setting. You will also have an opportunity to ask us questions so that you can make an informed choice. We also want a chance to tell you about our university and PGCE Secondary programme, as we think we have lots to offer a keen and aspiring trainee teacher and are as excited about your future as you are!

We look forward to meeting you at interview and wish you well for the day. Please arrive 15 minutes before your allotted time so we can start the programme promptly.

Best wishes

Jason Davies

PGCE Secondary Programme Leader for Art & Design, D&T and ICT & Computer Science
Cardiff Metropolitan University

Cardiff Met is the largest provider for PGCE Secondary in Wales and one of the largest in the UK. It is also one of only 4 universities to be awarded accreditation for Initial Teacher Education in Wales from September 2019:
