- MOHE Lebanon
- MOHE Morocco

BUCUM Consortium

The project team Professor Alfredo Moscardini and Mr AbouBakr Fathalla discussed the project rules and regulations, financial control, operational guide as well as detailed WP packages.

The consortium had two networking sessions between the main events which allowed the consortium members to exchange their experience and knowledge in the Tempus project, this opportunity allowed some partners to get to know Tempus in more details and to engage with more experienced partners on how to work with Tempus.

In the end of the two days, the consortium was more integrated and looking forward to working together to achieve the project objectives.
