## BSc (Hons) Architectural Design & Technology Summer Project – Favourite Building

### Introduction

It is great to welcome all our new students to the BSc Architectural Design and Technology course here in Cardiff Metropolitan University.

In order to find out a bit more about you we want you to complete a range of tasks during your Welcome Week. Your summer project is to do some preparatory research!

### Project Details

Hopefully, you are all passionate about buildings and architecture. So here is an opportunity to tell us about a favourite building.

You should identify a favourite building from your local area. It can be any type of building from a shed to a skyscraper.

Take a set of photographs, minimum, 4, maximum 10, of your building and save them on your phone, memory stick etc. The photographs can be both external views and internal views.

You should also attempt a freehand sketch of the building or maybe just a part of it.

Then write 100 words or so describing the building as accurately as you can and explaining why you have chosen it.

Remember we will use this work for part of your Welcome Week project so take your time and do it well!
