- Development of the leadership centres
- E-learning module development
- Creation of network for the university leaders- ARELEN
- Formation of WHEEL
- Development of the new online Master's Degree course '*International Masters of Science in Innovative Leadership Management*'.

LHEM

Further meeting content

Performance measures:

During the meeting, Prof. Alfredo Moscardini introduced all attendees to the performance measures which have been developed by Cardiff Metropolitan University and MUBS. These performance measures are used as a tool for measuring the quality control within the project outputs.

This quality control tool has been designed in order to check and monitor the level of quality within the following levels of the project: institutional, national and transnational level. All project outputs are subject to this tool.

Creation of a press release:

The creation of a press release was discussed, followed by the idea of developing a TEMPUS LHEM book with approx. 100-200 pages. Prof. Alfredo Moscardini suggested that this book could be distributed to various partners and HE ministries in order to promote the TEMPUS LHEM project, partner institutions and overall project success.

The proposed structure of the TEMPUS LHEM book included the following:

- Foreword quotes from all ministries involved
- Advertising each organisation at the beginning of the book on one page (e.g. name, background, vision, mission, main areas of expertise, etc.)

Other Tempus projects:

It was discussed that WHEEL, ARLEN and Leadership Centres will be utilised on to the BUCUM project, and that there will be an inclusion of the BUCUM partners from Egypt and Libya into the various ideas developed during the LHEM TEMPUS project.

The dissemination of the TEMPUS LHEM project will be discussed further in more detail during the next meeting in Corfu on 27th - 30th of July.
